REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Applicant should note that, as explained in previous office actions, the claims contain "product by process" claim language. Such claims are not limited to the manipulations of recited steps, only to the structure implied by the steps. However, the structure implied by the steps should be considered when assessing the patentability of product-by-process claims where the manufacturing process steps would be expected to impart distinctive structural characteristics to the final product. Here the Applicant's steps result in a structural characteristic of the final product that is sufficient to distinguish it from the prior art. Specifically, the induction of crystallization after depositing silicon nuclei result in a film of greater uniformity than the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy K. Potter whose telephone number is 571 272 1842. The examiner can normally be reached on M-F.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
